

See-through Biomate feeder series

Biomate see-through feeders are a convenient and safe way of introducing solid biocide and other corrosive chemicals into chilled water circulating loops. Constructed of clear UV-PVC body allows the chemical level to be viewed without opening the cap.

The Biomate feeder series come standard with a 6" Body and Cap, O-Ring sealed large open wide-mouth top and with wide bolt-down base. Available with 1" inlet and outlet side union ports, pressure relief valve and optional uPVC piping kit to complete the piping installation. 3/4" available upon request. Models available: 6.8 Kg, 11.3 Kg and 22.7 Kg.

Optional plumbing kit:

- uPVC fittings for operation to 8.6 bar at 38°C. Kit contains: two unions, three ball valves, two tees, two 90-degree elbows, and required nipples and plugs.
- Tough Polysulfone Flow-water (USA) 5 to 37.5 LPM

Standard Features

- Easy-open wide-mouth top
- 6" body See-through design
- Top opening threaded O-ring closure
- Pressure relief valve
- Bottom inlet and drain ports, 1" union for high-flow systems
- Wide bolt-down base

Suitable for:

- Swimming-pools
- Spas
- Water features
- Cooling towers
- Other industrial applications
